

Possible Menopause-Related Issues

There are reported to be 34 possible 'symptoms' of menopause!! (Some lists have even more!) But are they really symptoms, if menopause isn't a disease? Here's the full list of things that can happen around menopause that may or may not be attributable to it.

DO NOT let this list scare you! Many we'd never heard of before!

It's here for completeness and so that if you notice these changes, you know those may be perimenopause/menopause/hormonal imbalance related.
